EDUCATION

Virginia Commonwealth University, College of Engineering *Richmond, VA*
B.S. in Computer Science | Concentration in Software Engineering | Minor in Artificial Intelligence *May 2026*
Relevant Coursework: Data Structures & Object Oriented Programming | Algorithm Analysis with Advanced Data Structures | Databases | Software Analysis & Testing | Software as a Service | Operating Systems | Data Communication & Networking | Design & Implementation User Interface | Computer Systems | Programming Languages

PROFESSIONAL EXPERIENCE

Freelance Web Developer *Aug 2026 – Present*
Bob The Tech Guy, Computer & Networking Services *Richmond, VA*

- Redesigned a live 415-page WordPress site for a relocating IT services client, adding a dual-location NJ/VA presence and 9 local SEO landing pages
- Built a versioned CSS/JS bundle served via GitHub and jsDelivr CDN, shipping 6 releases with test-driven bug fixes, WCAG AA accessibility, and schema.org SEO markup
- Gathered requirements directly from the business owner and authored the design spec and implementation plan

Software Engineering Intern *May 2025 – Aug 2025*
Amentum, Supporting NASA Langley Research Center *Hampton, VA*

- Modernized a client-side MATLAB application for real-time data monitoring by implementing event-driven GUIs and back-end components to unpack and display UDP data from secure networks, improving responsiveness
- Engaged in collaborative design sessions and brainstorming with a team of software engineers to propose and refine new application features, improving system architecture and functionality.
- Consulted with clients and test engineers to gather and analyze functional and non-functional requirements, ensuring development aligned precisely with user needs and QA standards
- Developed supporting Python scripts to assist with data processing and automation alongside the core application

Computer Science Teaching Assistant *Aug 2024 – May 2026*
VCU College of Engineering *Richmond, VA*

- Conducted code reviews and delivered personalized coding assistance tailored to individual learning styles, resulting in optimized student code
- Mentored 150+ students on computer science concepts, improving lab results and test scores by 20%

LiDAR and Camera Sensor Data Fusion Researcher *Aug 2024 - May 2025*
DoD ASPIRE Capstone Project, U.S. Army *Richmond, VA*

- Developed a multi-modal deep learning system using PyTorch and EfficientNet for 85% accurate pedestrian detection
- Engineered a custom data preprocessing pipeline that transformed sensor inputs for efficient neural network training
- Implemented Agile (Scrum) with two-week sprints and daily stand-ups, meeting all project milestones on schedule

PROJECTS

Sports Analytics Platform *Aug 2024 - Dec 2025*

- Developed a full-stack sports analytics application using Next.js, React, TypeScript, and Tailwind CSS for the frontend, and Node.js/Express for the backend.
- Integrated real-time data sources, including the Sportradar API and Odds API, to provide live odds comparison and tracking of player statistics across various sports.
- Engineered the backend with PostgreSQL and Prisma ORM for efficient data management, used Redis for caching to enhance performance & used Chart.js to present historical data analysis and trends effectively.
- Applied Test-Driven Development practices and used Postman to test and validate REST API endpoints prior to integration, reducing bugs in the data pipeline

LEADERSHIP & ACTIVITIES

National Society of Black Engineers (NSBE), Member, VCU *Aug 2022 - May 2026*

- Mentored underclassmen in computer science, providing academic guidance and career development support

SKILLS

Programming Languages: Java | JavaScript | TypeScript | Python | C/C++ | SQL | MATLAB

Software Engineering Tools: Docker | Git/GitHub | Unity | Figma | Flask | Agile Methodology | Quarto | JUnit |

Test-Driven Development (TDD) | Selenium | Postman

Web Development Skills: React | Node.js | HTML | CSS | WordPress | Tailwind CSS | REST APIs | Next.js
